

Keepit Backup and Recovery for Microsoft 365

Keep your business running with the best Microsoft 365 protection

Company-wide loss of email brings disruption to every part of the business and has a ripple effect — even after recovery. Microsoft sits at the heart of your operations, and with this centrality comes risk, from accidental data deletion to unexpected systems downtime. Under the Shared Responsibility Model, protecting data falls on you and as Microsoft states, “one of the most important steps you can take to protect your data is to have a reliable backup and restore plan.”*

With the market’s most comprehensive Microsoft 365 coverage, Keepit keeps your business rolling with instant access to all your data, always.

Time-saving usability

Set up a Microsoft 365 connector in minutes. Quickly find what you need and restore anything, from a single record to an entire dataset, in just a few clicks.

Business continuity

Keep your business running with instant access to clean copies of your data, from documents to user permissions, anytime you need them.

Unlimited storage

Keep unlimited backups without any extra costs. Free up space in Microsoft, cut storage fees, and advance your compliance efforts.

THE RISK

85% of organizations reported at least one **data loss incident** in the past 12 months.
